

Acoufelt improve the human experience by designing for the ears as well as the eyes.

CAPABILITY STATEMENT.

OUR MANDATE.

We design beautiful and functional products, informed by our acoustic expertise and interior design intelligence.

We manufacture with precision to achieve exacting specification, utilising safe and sustainably-sourced fibers.

We keep people at the heart of our approach, ensuring we continue to be easy to do business with, deliver projects in full and on time, and create optimised soundscapes where the outcome is one of enhanced human comfort, health, productivity, and effectiveness.

OUR UNIQUE APPROACH.

Every surface, each human context, and the business goals of a space combine to present a unique thumbprint of sound challenge.

Our acoustic FWC™ approach is the holistic perspective we take to understanding the needs of every soundscape, and offering solutions to best direct, shape or eliminate unwanted sound within each space.

OUR MANUFACTURING.

Our production team is equipped with 40+ years of manufacturing experience, and our procedures and equipment are controlled under internationally recognized standards. This ensures our products meet the requisite quality required for commercial use, as well as achieve our promise of delivering on a beautiful finish.

GLOBAL REACH.

We manufacture acoustic products in **Australia, North America, United Kingdom, Japan and Thailand**, and warehouse stock around the globe in strategic locations. This global presence ensures we can deliver your acoustic solutions on time and in full, from wherever you are in the world.

SAFETY AND SUSTAINABILITY.

Where possible, Acoufelt pursue sustainable practices in manufacturing that close the loop on the circular economy through considered raw material sourcing.

Acoufelt are also committed to testing products against a number of internationally recognised environmental and human safety standards and accreditations, to ensure our products can be manufactured safely, and are safe for human use.

Declare.

WHY WE CARE ABOUT ACOUSTICS.

We spend approximately 93% of our lives inside. By fostering pleasant acoustic environments to accommodate the people within them, we add value to our businesses, institutions and residences.
