

Atria

SoftStep™ Carpet Tiles

Atria – Dune Mist

Quiet colour, shaped by light

Inspired by the architectural atrium, the open and light-filled heart of a building, Atria transforms interiors into calm, welcoming spaces grounded in warmth and natural atmosphere.

Its understated design creates a quiet foundation that allows furniture, materials and personal styling to take centre stage.

Atria – Fawn

The light-filled charm of Atria

Crafted with a clean tonal surface and subtle variation, Atria brings gentle depth and dimension to the floor without creating visual noise. Its soft underfoot feel is paired with lasting durability, making it suitable for both residential and high-traffic commercial interiors.

Unlike traditional carpeting that requires complex specialist installation, Atria's premium modular tiles make it easier to achieve a polished, professional finish. Individual tiles can also be replaced when needed, allowing your flooring to adapt with your space over time.

Atria – Linen Veil

Designed for comfort and performance.

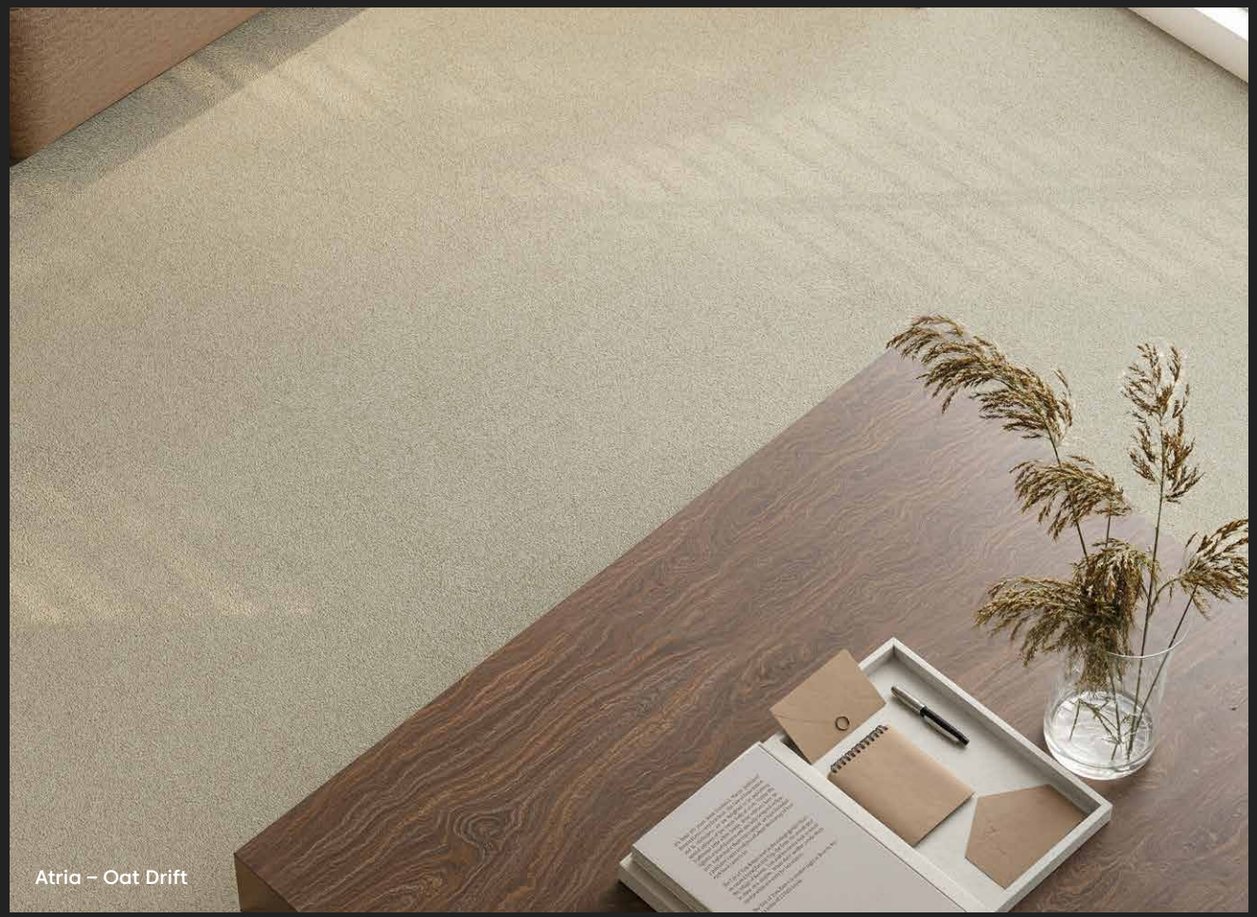

A standout feature of Atria is its clean tonal surface, bringing a refined specification option to the SoftStep™ collection. Its generous 500 × 1000mm tile format supports faster, more efficient installation, while the cushioned construction provides softness underfoot without compromising commercial performance.

Atria – Oat Drift

From soft light to deep shadow

Atria presents eight refined neutrals, with each colourway capturing a distinct quality of light and natural atmosphere. Linen Veil and Oat Drift reflect soft, diffused light, while Fawn and Dune Mist introduce gentle warmth and balance. Fogline and Nimbus bring cooler, more subdued tones, before Shadow Hearth and Winterfield complete the palette with immersive charcoal and near-black shades.

Subtle variation within each colour gives the surface depth and dimension without creating visual noise. Together, the eight colourways form a considered spectrum from light to shadow, creating a calm and adaptable foundation with a warm, natural presence.
