

BarrierBack™
Carpet Tiles

Integrating acoustics and aesthetics

BarrierBack™ is a carpet tile designed for aesthetic and acoustic versatility. The collection is available in selected patterns and colorways that integrate with Acoufelt’s wall and ceiling offering, whilst also demonstrating functional sound absorption and sound transmission capabilities. The Acoufelt BarrierBack™ portfolio is yet another commitment to our holistic and integrated design approach to aesthetics and acoustics, which we call Acoustic FWC™.

SOUND ABSORPTION AND TRANSMISSION

BarrierBack™ carpet tiles achieve absorption and transmission capabilities through both the face pile layer and the impervious backing components. The face pile layer facilitates moderate sound absorption, trapping sound in the loop pile. The impervious backing works to prevent sound from transferring through the tile. These combined acoustic benefits means BarrierBack™ carpet tiles can be used to create the optimal soundscape.

SUSTAINABLE ECONYL YARN

A substantial component of the face pile layer in BarrierBack™ carpet tiles is comprised of recycled ECONYL yarn, made from regenerated nylon fibers recovered from fishing nets, fabric scraps, carpet flooring and other industrial waste.

QUICKDROP™ COMPATIBILITY

QuickDrop™ is an innovative ‘no-adhesive’ gripping layer that can be added to the back of the carpet tile as an alternative to adhesive, floor sealers, glue or taping, to facilitate a clean, easy and flexible installation. This feature is available as an add-on.

QUICK SHIP

The Quick Ship offering by Acoufelt signifies our commitment to stocking products with minimal lead times. Our BarrierBack™ collections are constantly being produced to replenish stock levels.

Argentium
Emerald Solid (AR11), Silver Beam (AR05) and Emerald (AR01)

Quick ship available

Certified low VOC

20 year wear warranty

Impervious backing

20 year colorfastness warranty

Easy to cut and install

High resistance to fire

Low maintenance

Yarn made from 100% recycled nylon fiber

QuickDrop™ compatible
