

QuietBack™

Carpet Tile Take Back Program

Acouflor's mission to continually work towards circular economy practices has seen us pursue a take-back program, with the aim of keeping Acouflor carpet tiles out of landfill.

With the support of Cleanway ResourceCo and their Alternative Fuels program, Acouflor carpet tiles can be diverted from landfill at the end of their useful life, to be processed into an alternative fuel source.

Acouflor carpet tiles and install off-cuts can be sent directly to ResourceCo with these 3 simple steps:

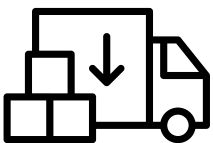

1 - Palettise the tiles and offcuts

2 - Use this [link](#) to open a new account, or, use your existing account with ResourceCo to book the load, paying \$320 per tonne (EX GST)*

*Fee as of August 2024. ResourceCo have the right to make changes to their fees

3 - Drop off the pallet at your nearest ResourceCo Recovery Facility

Relish in the good feeling that you've diverted carpet tiles from landfill – high five!
