
Filasorb™ Premium Felt

Our signature acoustic solution, crafted from our proprietary premium felt – FilaSorb™.

A strategic blend of fine fibers, varying in denier and thickness, maximizes the material's surface area. This increased surface area creates a highly active environment for sound absorption and dispersion, effectively minimizing reverberation and echo.

Regular Wall Panels – Shiraz

Our FilaSorb™ collection isn't just about superior acoustic performance; it's also a celebration of color.

We provide comprehensive design solutions, starting with an impressive palette of unique hues that empower designers and architects to create spaces resonating with their vision.

To ensure well-lit, functional, and aesthetically pleasing environments, we also meticulously measure and provide Light Reflectance Values (LRV) for each FilaSorb™ color.

Sustainability Benefits

01

Acoufelt's FilaSorb™ collections are all made from post consumer recycled plastic drink bottles, diverted from landfill.

02

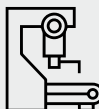

The discarded drink bottles are cleaned and cut into flakes before being melted and extruded into fibers of natural white colour.

03

The regenerated fibers are clean and odorless like virgin fibers.

04

The regenerated fibers are then colored or printed and used to construct brand new products like panels and baffles.
