**FILTER**  
Wall panels

Filter Wall Panels are an innovative acoustic solution that enhances sound quality while adding a three-dimensional design element. These panels are uniquely designed to protrude 76mm from the wall, available in 4 different undulating designs creating depth and texture that transforms any environment.

Crafted from sustainable materials, Filter offers excellent sound absorption and is available in a variety of colors and sizes. Ideal for commercial, educational, and hospitality spaces, it seamlessly blends style with acoustic functionality.

Reception

# DESIGNED TO MEET YOUR GREEN BUILDING GOALS.

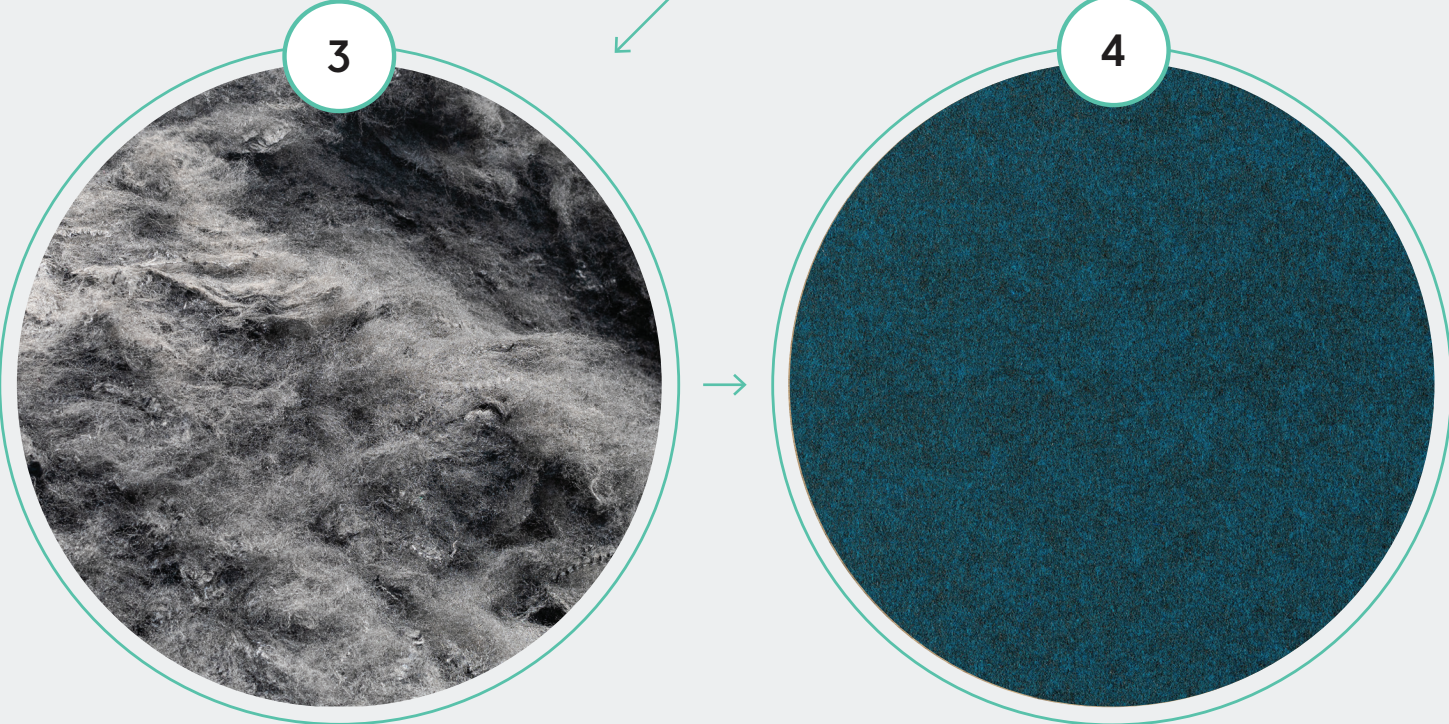

Waste is converted into useful design in the creation of WoodBeQuiet™. Made from a minimum of 60% post-consumer recycled material, each carton contains the average equivalent of 324 x 600ml recycled plastic drinking bottles diverted from landfill.

In addition, planks are produced using 40 per cent solar energy – honed through solar panels on the factory roof – and are fully recyclable at the end of their use. Users can also be assured that planks are certified ‘Red List Free’ – meaning they are free from unsafe, polluting materials.

Acoufelt's WoodBeQuiet™ planks collection is made from post-consumer recycled plastic drink bottles, diverted from landfill.

The discarded drink bottles are cleaned and cut into flakes before being melted and extruded into fibers of natural white color.

The regenerated fibers are clean and odorless like virgin fibers.

The regenerated fibers are then colored or printed and used to construct brand new products like WoodBeQuiet™ planks.
