

Flinders

Featuring QuietBack™

The Flinders carpet tile range featuring QuietBack™ is a 100% solution dyed nylon square carpet tile and achieves an acoustic NRC rating of 0.35.

Inspired by the ancient beauty of the Flinders Ranges in central northern South Australia, this collection of carpet tiles combines ageless stone colours with a subtle shatter-crack pattern that can lift the aesthetic of any space.

As one of the world's best-kept secrets, the Flinders Ranges has been able to maintain its rugged, untouched landscape. Ridgetops and outcrops of faulted sediments make this arid mountain range as beautiful as it is geologically and historically important. Along with the acclaimed Wilpena Pound, many other treasures of the Flinders Ranges have been the inspiration for Australian artists, one being Hans Heysen.

It is little wonder that this unique geological landscape inspires such a beautiful carpet collection.

The Flinders carpet tile collection from Acoufelt will help you in your quest toward Making Quiet™ for working, learning and living spaces. By delivering solutions that eliminate compromise, Acoufelt allows you to design for the ears as well as the eyes.
