# FORMATION

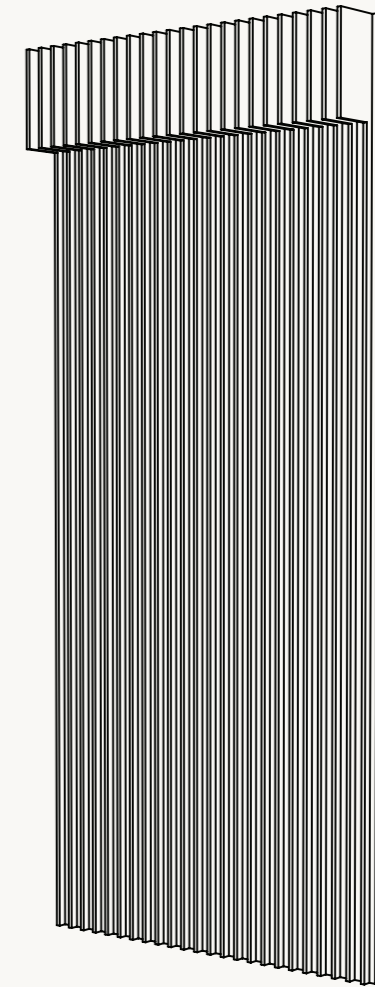

Wall panels

**Formation panels draw visual interest with intentional slat spacing that changes the view from every angle, capturing both attention and sound in any space.**

Available in five designs – ‘Concave’, ‘Convex’, ‘Fin’, ‘Monument’ and ‘Perch’ in a range of Filasorb™ colour options that easily attach over any existing wall finish.

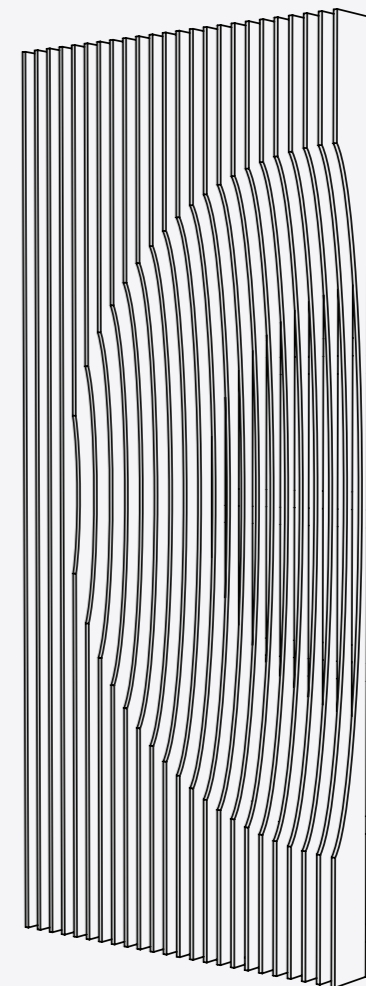

PERCH

The precision-cut slats of 'Perch' grab attention while managing sound. The asymmetrical design creates an interesting division of space drawing the eye upward with its unique crown rail.

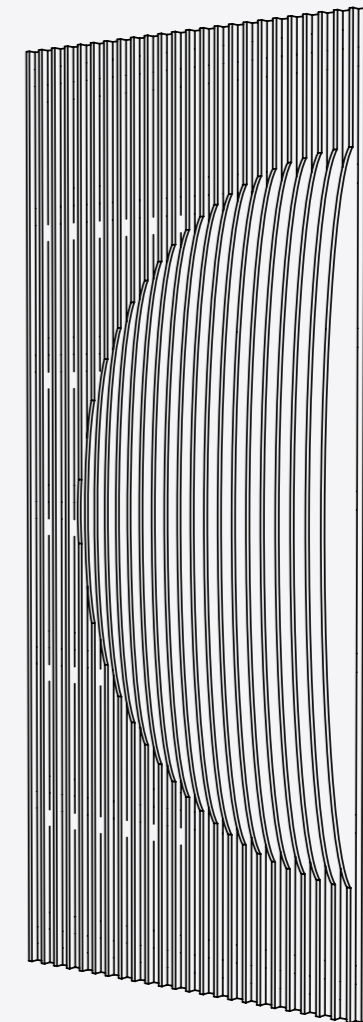

CONCAVE

Compelling from any angle,  
'Concave' creates a novel visual  
backdrop. Its soft curves and  
dimensional form invite a sense of  
movement and depth to the space.

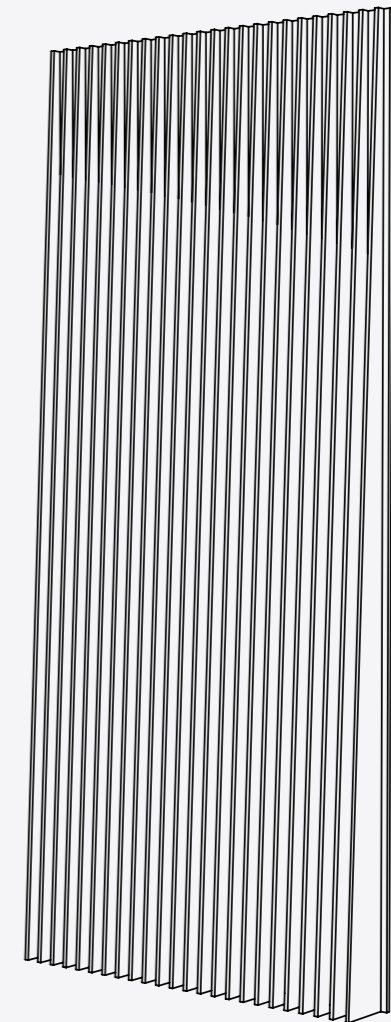

CONVEX

'Convex' plays with light and shadow to create a sense of depth and fluidity. Its sculptural form adds a bold, modern edge to acoustic design, transforming walls into dynamic focal points.

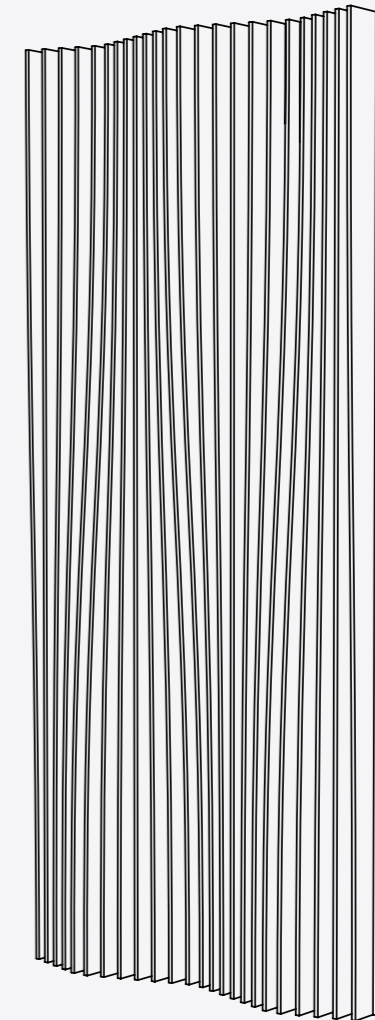

FIN

‘Fin’ softens acoustics while making a bold visual statement. Its clean lines and sculptural form bring a sense of rhythm and sophistication to any space.

MONUMENT

‘Monument’ offers a gently curved profile and undulating design that welcomes a sense of calm.

# DESIGNED TO MEET YOUR GREEN BUILDING GOALS.

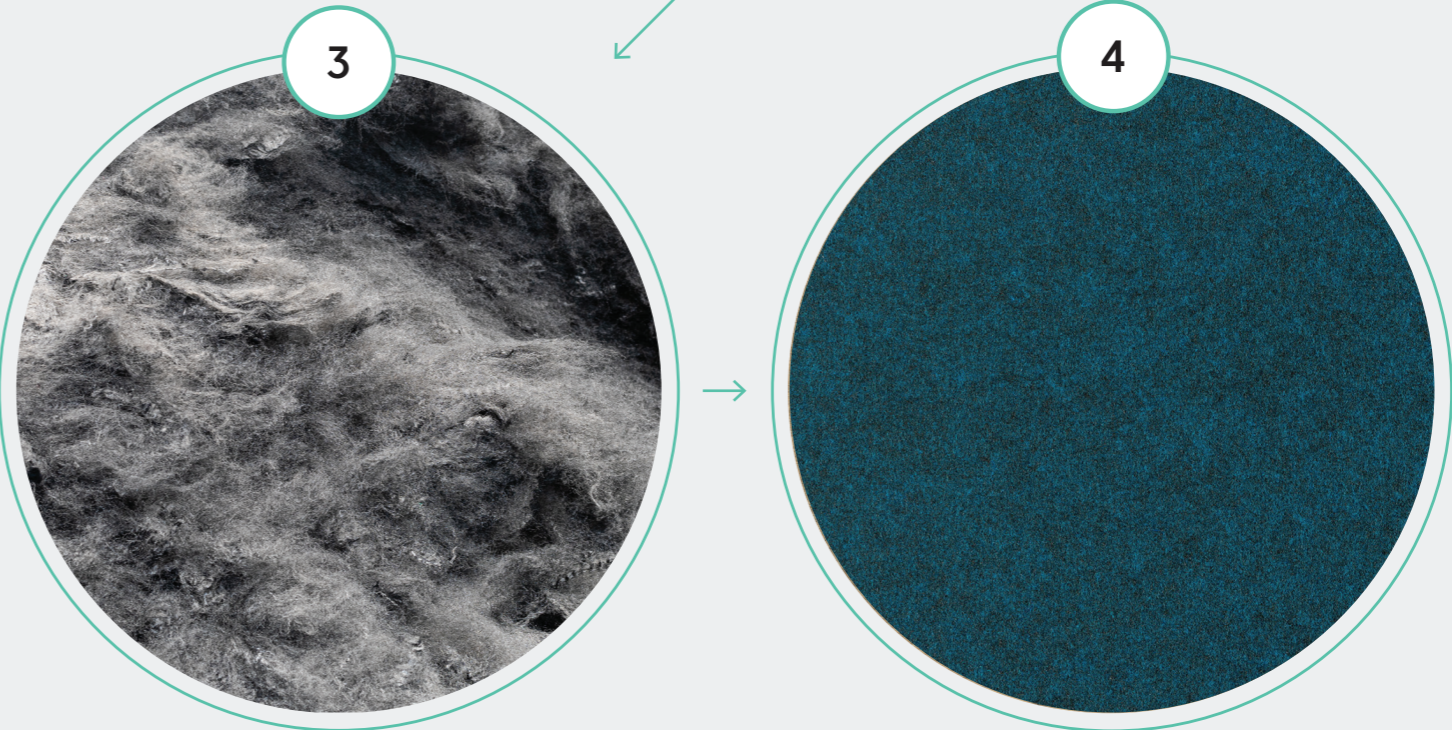

Waste is converted into useful design in the creation of WoodBeQuiet™. Made from a minimum of 60% post-consumer recycled material, each carton contains the average equivalent of 324 x 600ml recycled plastic drinking bottles diverted from landfill.

In addition, planks are produced using 40 per cent solar energy – honed through solar panels on the factory roof – and are fully recyclable at the end of their use. Users can also be assured that planks are certified ‘Red List Free’ – meaning they are free from unsafe, polluting materials.

Acoufelt’s WoodBeQuiet™ planks collection is made from post-consumer recycled plastic drink bottles, diverted from landfill.

The discarded drink bottles are cleaned and cut into flakes before being melted and extruded into fibers of natural white color.

The regenerated fibers are clean and odorless like virgin fibers.

The regenerated fibers are then colored or printed and used to construct brand new products like WoodBeQuiet™ planks.
