# Monitor Featuring QuietBack™

The Monitor carpet tile collection is a 100% solution dyed nylon loop carpet tile in the plank format. Featuring QuietBack™, this carpet tile achieves an acoustic rating of NRC 0.35. The acoustic performance of this tile allows you to design for both the eyes and the ears.

The Monitor collection was inspired by the clean and elegant lines of the design studio itself. Minimalistic workstations with wide screen monitors sit idle late at night. Power-saving mode leaves the screen glowing a dull charcoal while brightly coloured data cables punctuate the lifeless office with a sense of the energy that will fill the room in the morning.

This is where we found the inspiration for the Monitor collection design; in the stillness of anticipation.

The Monitor carpet tile comes in eight designs; four shades of charcoal and four with coloured pinstripe features. The plank design provides flexibility in design, enabling for the mix and match of tiles to make the floor a feature in any commercial space.

The Monitor carpet tile collection from Acoufelt will help you in your quest toward Making Quiet™ for working, learning and living spaces. By delivering solutions that eliminate compromise, Acoufelt allows you to design for the ears as well as the eyes.
