MultiStorey
Featuring QuietBack™

Inner-city high-rise developments have resulted in new and interesting working, learning and living spaces. People in close proximity need soothing aesthetics and the ability to find a quiet place to think. Such has been the inspiration for the MultiStorey range. Earth and metal with a subtle and irregular pattern makes the MultiStorey range one of the most contemporary designs in the Acoufelt acoustic carpet tile range. It is subtle and sophisticated, reflecting life on the upper floors; removed from the noise and bustle of the street-level. MultiStorey is a reflection of function with its acoustic properties helping to make the room quiet.

The MultiStorey carpet tile collection is a 100% solution dyed nylon carpet tile in the 500x500mm square format. Featuring QuietBack™, this carpet tile achieves an acoustic rating of NRC 0.40. MultiStorey carpet tiles have been designed specifically to provide a superior acoustic performance to that of similar floor coverings.

Available in six beautiful colourways, the MultiStorey range has been designed specifically to provide the architect or designer with the ability to design a space for aesthetics as well as acoustics. Acoufelt helps eliminate the compromise, allowing a space to be designed for the ears as well as the eyes.
