**SEAM**  
Wall Panels

**Seam Wall Panels bring together sophisticated design and exceptional acoustic performance to transform spaces into serene, architectural statements**

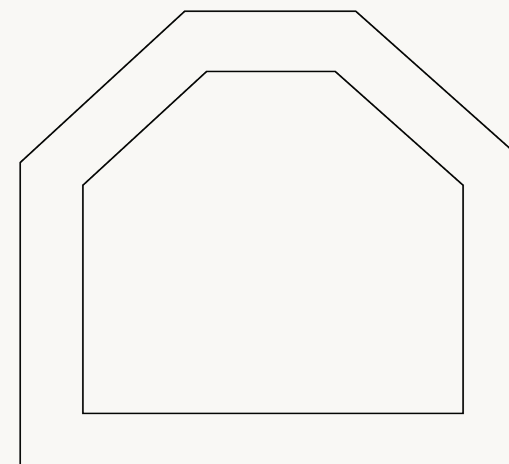

Available in two distinctive profiles, Block with its crisp, linear definition and Igloo with its softer, curved edges. Seam adds depth and verticality, making interiors feel taller and more structured.

IGLOO

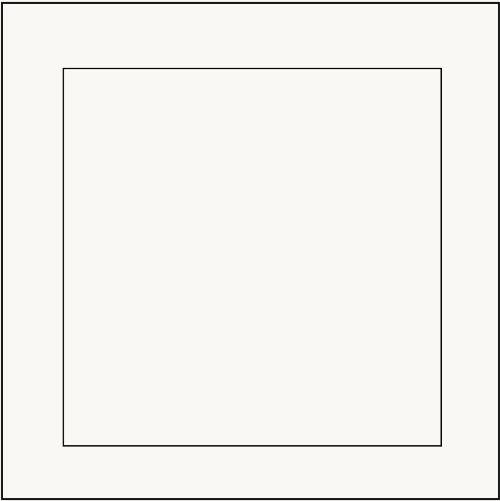

Seam Wall Panels 'Igloo'

# DESIGNED TO MEET YOUR GREEN BUILDING GOALS.

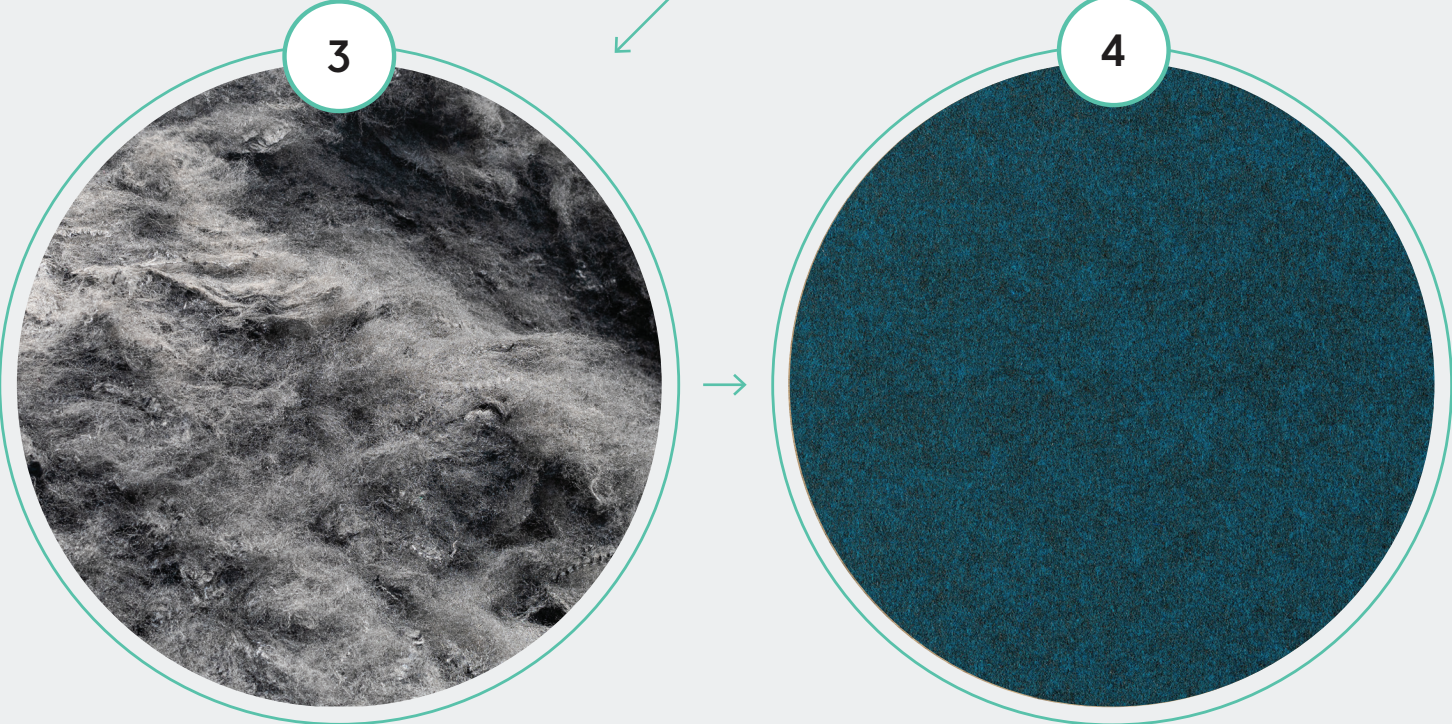

Waste is converted into useful design in the creation of WoodBeQuiet™. Made from a minimum of 60% post-consumer recycled material, each carton contains the average equivalent of 324 x 600ml recycled plastic drinking bottles diverted from landfill.

In addition, planks are produced using 40 per cent solar energy – honed through solar panels on the factory roof – and are fully recyclable at the end of their use. Users can also be assured that planks are certified ‘Red List Free’ – meaning they are free from unsafe, polluting materials.

Acoufelt's WoodBeQuiet™ planks collection is made from post-consumer recycled plastic drink bottles, diverted from landfill.

The discarded drink bottles are cleaned and cut into flakes before being melted and extruded into fibers of natural white color.

The regenerated fibers are clean and odorless like virgin fibers.

The regenerated fibers are then colored or printed and used to construct brand new products like WoodBeQuiet™ planks.
