

## Vista, Desert Ceiling Frames

WoodGrain Collection

Evenly arranged cubes of the Vista Desert design mimic a calming, open expanse of land while ensuring superior sound management. Choose a single Premier color or WoodGrain option or select two complementary finishes for the cubes and the backing. Modern, modular, and easy to install, Vista can change your outlook about working or meeting in a crowded space.

## What is a Noise Reduction Coefficient (NRC)?

You'll find the NRC rating in the specifications of all of our products. This acronym stands for Noise Reduction Coefficient, and is expressed as a single number, a rating that describes the degree to which acoustic products can absorb sound.

You can use NRC values to understand the overall performance of our acoustic wall and ceiling products. The higher the NRC, the better the product is at soaking up the sound.

*Performance Indices: Noise Reduction Coefficient (NRC) results represent the absorption coefficients measured at the one third octave bands at 125, 250, 500, 1000, 2000 and 4000 Hz rounded to the nearest 0.05. Acoustic testing has been performed according to the methods mentioned above. Customization of installation of the product could alter the results. Sound Absorption Average (SAA) indicates the absorption coefficient average for the twelve one-third octave bands ranging between 200 and 2500 Hz.*
